DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 16-27, drawn to a compute system with specific physical shape and orientation of its structural elements and with basic initial operation functions, classified in class 248, subclass 919.
 - II. Claims 28-53, drawn to a compute system for presenting an interactive multimedia book, classified in class 704, subclass 270.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing a rectangular shape and/or using a rotated display associating a turn on/off function; and invention II has separate utility such as voice recognition and/or speech synthesis features that can be used in other computer systems with physically different structures. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2654

4. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
